

solve · create · succeed

GLINTECH CORPORATE FACT SHEET

"At GLiNTECH, we utilise our specialisations to enhance the useability of corporations' technology assets in order to successfully integrate Portals, Collaboration suites and BPMS systems. We understand the technology and can help business derive value."

~ Dimitri Spyridopoulos, Founder

"GLiNTECH have been developing and integrating systems for enterprise clients for 10 years. Even the name GLiNTECH is derived from the three words "GLobal iNtegration TEChnology. We believe in on-the-job training so that everyone is client focused, this challenges our team's skill set from day one."

~ Desma Spyridopoulos, Co-Founder

Core

Software development for enterprise clients.

Specialisation

A successful history of Integration and SOA Services.

Differentiator

Utilising our core and specialisation to integrate and extend our vendor alliance portal, collaboration and BPM products.

Leadership

GLiNTECH is a young and dynamic company that believes in tasking every team member with taking responsibility for the organisation as a whole.

The team are encouraged not to view their job roles in a silo, but rather as one part of a greater whole. It is this approach that allows us to work within a very flat structure where experienced consultants mentor and develop more junior members of the team and cross-functional problem solving occurs.

Values

- Technical solutions that are demonstrable
- Be the trusted IT advisor
- Everyone is solutions oriented
- Software Development should be interesting and challenging
- Always focus on business outcomes

History
